

Digi-Jet Industrial UV LED Inkjet Printers

The Digi-jet series is the latest addition to our printing machinery range. Built to an **industrial** standard, this latest generation of UV LED machines are equipped with Electric DOD Piezo print heads that deliver high resolution, vivid digital images on both dark and light substrates. The LED UV curing is an Earth friendly solution with significant advantages that allows the machine to satisfy the demands for both short and long run print requirements; perfect for printing personalised souvenirs, industrial products, business gifts and more.
